Saugal , Lalitpur

SUMMARY

My name is Bitisha Maharjan, and I'm a dedicated individual with a strong passion for web development. As a student , I've been actively engaged in honing my skills in various technologies. My expertise spans the MERN stack, Next.js, JavaScript, TypeScript, Python, Java, and I have hands-on experience with HTML5 canvas for game development. I've successfully completed relevant courses on platforms such as Coursera and Amazon, earning certificates that validate my knowledge. When it comes to front-end development, I find React and Tailwind CSS to be my preferred tools for creating engaging and responsive user interfaces. I am currently exploring opportunities, whether it be freelancing or a full-time role, to apply and further enhance my skills in web development.
